Initial (15 June 2017)	1.0000
Highest (30 January 2018)	1.0596
Lowest (24 March 2020)	0.8083
NAVPU – 30 August 2024	1.0303

Risk Classification

The Fund is suitable for investors with an aggressive profile or for those who take long-term views. As a marked-to-market UITF, the Fund's net asset value and total return may fall as well as rise as a result of stock prices and interest rates movements. On redemption of units, an investor may receive an amount less than the original amount of investment. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience.

BPI-Philam Active Allocation Fund Market Commentary

The BPI Government Bond Index rose by 0.72% in August as Philippine government bond yields decreased by an average of seven basis points (bps). Average daily trading volume for the month reached Php41.3 billion, up from Php34.5 billion in July, with most trades concentrated in 5- to 10-year securities. The Bureau of the Treasury (BTr) held four FXTN auctions in August, fully awarding the 5-, 7-, 15-, and 20-year tenors. Auction bids generally aligned with, or came in slightly below, secondary market bids at the time, with the BTr awarding at 6.128%, 6.14%, 6.125%, and 6.22%, respectively.

On the domestic front, July headline inflation accelerated to 4.4% from 3.7% in June, exceeding economists' median estimate of 4.0%. The higher-than-expected inflation was driven mainly by increases in housing & utilities (2.3% vs 0.1% in June), education (5.8% vs 3.8%), transport (3.6% vs 3.1%), and food & non-alcoholic beverages (6.4% vs 6.1%). Despite the inflationary pressure, the BSP cut rates by 25 bps in August, marking the first reduction in four years. Economists forecast that inflation may have cooled to 3.7% in August.

Internationally, US inflation decelerated from 3.0% in June to 2.9% in July, slightly below the 3.0% expectation. US Federal Reserve officials highlighted the ongoing moderation in inflation and slowing economic data, supporting the case for eventual policy rate cuts.

The Philippine Stock Exchange Index (PSEi) rallied for the 2nd consecutive month as investors cheered the Bangko Sentral ng Pilipinas' (BSP) decision to cut policy rate by 25 basis points to 6.25%. The local bourse was further buoyed by growing optimism that US Federal Reserve's (The Fed) will likely reduce rates in September. Market sentiment was also supported by improving GDP number and peso rebound. GDP grew by 6.3% year-on-year in 2Q2024 from 5.8% in 1Q2024 propelled by government spending which rose by 10.7% while the Philippine peso strengthened to Php56.15 or 3.98% on a month-on-month basis. The PSEi moved up 4.2% month-on-month to 6,897.54.

For trading activity, the market's daily value turnover improved to Php5.66 billion in August from Php4.35 billion recorded in the prior month. MSCI rebalancing which occurred at the end of the month helped spur market's turnover. In terms of foreign activity, foreign buying was sustained for another month, notching US\$143 million. Top foreign bought stocks were ALI (+US\$40 million), BDO (US\$32.6 million) and ICT (US\$17.6 million). Foreign participation rose to 56%.

On a per stock basis, the top three index gainers for the month included: CNVRG (+29.98%), ALI (+19.66%) and JFC (+12.96%). Meanwhile, the bottom three performers were: URC (-23.53%), JGS (-15.47%) and AEV (-6.35%).

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
