Average daily trading volume for the month reached Php36.1 billion, lower than Php39.5 billion in October, with most trades concentrated in 5-year followed by 1-year papers. Despite the lower average trading volume, foreign investors' fixed income volume was net buying for the month compared to previous month's net selling.

The Bureau of the Treasury (BTr) held two FXTN auctions in November, offering the 5- and 20-year tenors. FXTNs 20-27 (20-year) and 7-67 (5-year) were fully awarded at average yields of 6.095% and 5.954%, respectively.

Locally, October headline inflation rose to 2.3% year-on-year (YoY) from 1.9% YoY in September, well within Bangko Sentral ng Pilipinas' (BSP) forecast range of 2.0% to 2.8% for the month. The pick-up in inflation was driven mainly by faster food inflation due to adverse weather conditions for the month and tapering of favorable base effects from last year. Rice inflation in October also accelerated by 9.6% YoY from September's 5.7% YoY, breaking its 6-month deceleration streak. The reversal of the course due to year-on-year base effects as rice inflation slowed in 2023 after the government implemented a rice price ceiling shortly last year.

The Philippine Stock Exchange Index (PSEi) fell in November amid large foreign selling following the outcome of the US Presidential Elections. The Donald Trump 2.0 is perceived to strengthen the U.S Dollar which negatively affect emerging markets. The Philippine Peso depreciated to Php59 level during the month. Moreover, the local 3Q 2024 GDP failed to improve market sentiment as it came out at 5.2%, lower than 5.7% consensus estimate.

The Average Daily Turnover improved to Php56.275 billion or 5.5% higher month-on-month in November. Meanwhile, in terms of foreign activity, foreigners adopted a risk-off stance which bucked the trend of 4 consecutive months net foreign buying. Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
