| | |
|--------------------------|--------|
| Initial (15 June 2017) | 1.0000 |
| Highest (8 October 2024) | 1.0900 |
| Lowest (24 March 2020) | 0.8083 |
| NAVPU – 31 March 2025 | 1.0066 |

Risk Classification

The Fund is suitable for investors with an aggressive profile or for those who take long-term views. As a marked-to-market UITF, the Fund's net asset value and total return may fall as well as rise as a result of stock prices and interest rates movements. On redemption of units, an investor may receive an amount less than the original amount of investment. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience.

BPI-Philam Active Allocation Fund Market Commentary

The Philippine fixed income market experienced a relatively stable month in March 2025, with modest movements in yields and continued investor interest in government securities. The BPI Philippine Government Bond Index returned 0.44% for the month as rates crept higher by 0.7 bps on average, mostly on the very short end of the curve. Both domestic and international factors, including central bank policies, inflation trends, and geopolitical developments affected yield movements for the period. The Bangko Sentral ng Pilipinas (BSP) kept its key policy rate at 5.75%, citing the need to balance inflation control with economic growth. Inflation for the month of February remained within the target range at 2.1% year-on-year, although there were concerns about potential upward pressures from global commodity prices. Demand for government securities remained strong, particularly for short to medium-term bonds. The Bureau of the Treasury successfully auctioned off several tranches of Treasury bills and bonds, with yields awarded slightly lower than the previous month. Demand was quite healthy with oversubscriptions seen across all tenors, particularly the 5- and 7-year papers. Overall market sentiment was positive, supported by stable macroeconomic indicators and a favorable investment climate. Nonetheless, investors remained cautious amid the potential impact of US President Trump's tariffs on growth and inflation.

The Philippine Stock Exchange Index (PSEI) extended gains in March, rising by 3.05% month-on-month to close at 6,180.72. This was fueled by improved investors' sentiment early in the month as February inflation cooled to 2.1% from 2.9% in January, raising hopes of a potential rate cut by the BSP in April. The Philippine peso also strengthened on US Dollar weakness due to softer US economic data. However, gains were capped by cautious sentiment ahead of Trump's reciprocal tariffs set to be announced on April 2. Additionally, geo-political uncertainties further dampened investor sentiment. In terms of trading activity, the Average Daily Turnover dropped by 8% to P5.61 billion in March which was mainly supported by FTSE rebalancing. In terms of foreign activity, foreigners turned net buyers, registering at US\$50 million. Top foreign bought stocks include BDO (US\$28.26 million), BPI (US\$23.43 million), and MER (US\$15.72 million). Foreign participation remained at 53% in March. On a per stock basis, the top three index gainers for the month include: CNVRG (+19.90%), MER (+12.24%) and SMPH (+7.62%). Meanwhile, the bottom three performers were: CNPF (-9.53%), BLOOM (-8.46%) and JFC (-6.69%).

| ⑤ Fixed Rate Treasury Note 05/23/2044 | 3.98% |

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
