Highest and Lowest Unit Price Achieved

Initial (15 June 2017)	1.0000
Highest (8 October 2024)	1.0900
Lowest (24 March 2020)	0.8083
NAVPU –28 November 2025	1.0149

Risk Classification

The Fund is suitable for investors with an aggressive profile or for those who take long-term views. As a marked-to-market UITF, the Fund's net asset value and total return may fall as well as rise as a result of stock prices and interest rates movements. On redemption of units, an investor may receive an amount less than the original amount of investment. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience.

TOP HOLDINGS Asset Allocation

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data. BPI-Philam Active Allocation Fund Market Commentary

In November, local bond yields saw a month-on-month decline of 9.27 bps across the curve. Short-term yields (1 year and below) declined by an average of -3.48 basis points. The decline was most notable in the intermediate part of the curve as investors look to lengthen duration. The two and three-year declined the most by 18bps and 17 bps, respectively followed by the five-year with a 14 bps decline. The long-end also declined to the tune of 4 bps with growth prospects at risk. The BPI Money Market Index went up by 0.38%, BPI 1-5 Index up by 0.69%, and the BPI GS Overall Index up by 0.73%. October inflation came out at 1.7%, still below the government's 2 to 4 percent target range for the year. 3Q 2025 GDP also came out anemic at a print of 4%, lower than the 2Q print of 5.5%. The BSP surprised the market with a rate cut on October, moving ahead of potential economic slowdown amidst governance concern that dampened business sentiment. The dovish tone caused markets to price in further rate cuts going into December and 2026. Rates now stand at 4.75% after the cut. Market is expecting policy rate may reach 4% in 2026. The Philippine Stock Exchange Index (PSEI) had a choppy month in November before ultimately settling higher. The local bourse almost fell to a cliff, reaching sub-5,600, following a slew of weak domestic economic data such as dismal 3Q GDP, uninspiring 3Q corporate earnings coupled with heightened political issues. Concerns over Federal Reserve Policy Rates due to prolonged US Government Shutdown likewise dragged investor sentiment. However, the market was lifted by local bargain-hunting towards the latter part of the month. The PSEI rose by 1.56% month-on-month to close at 6,022.24. Trading activity surged in November with Average Daily Turnover registering at Php6.22 billion from Php5.00 billion following some key corporate action events such as the Maynilad (MYNLD) IPO and AREIT Secondary Share Placement. On foreign activity, foreigners turned "Net Buyers" at US\$78 million. On a per stock basis, the top three index gainers for the month include: CNVRG (+22.26%), SMC (+21.77%) and PLUS (+16.95%). Meanwhile, the bottom three performers were: URC (-13.70%), JFC (-12.74%) and SCC (-11.95%)
