Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data. BPI-Philam Active Allocation Fund Market Commentary

In September, local government bond yields moved in mixed directions. Short-term yields (1 year and below) declined by an average of 28 basis points, reflecting the market's response to easing inflation and monetary policy. On the other hand, longer-term yields (1 to 25 years) saw a slight increase, averaging a 1.6 basis point rise. Despite these movements, returns remained positive, with the BPI Government Bond Index gaining 0.27% and the BPI Money Market Index up 0.44% for the month.

The Bureau of the Treasury (BTr) continued its regular weekly auctions of Fixed Rate Treasury Notes (FXTNs), offering various tenors from 3 to 20 years. Most of the bonds, specifically the 3-, 5-, 7-, and 10-year FXTNs, were fully awarded at competitive yields ranging from 5.605% to 5.939%. The 20-year FXTN was only partially awarded, with an average yield of 6.421%, indicating selective investor appetite for longer durations.

Meanwhile, local inflation rose to 1.5% in August, up from 0.9% in July, driven mainly by higher food prices, particularly rice and vegetables, as well as increased transport costs due to fuel price adjustments. Despite the uptick, inflation remained within the Bangko Sentral ng Pilipinas' (BSP) target range of 2–4%, suggesting that price pressures were still manageable. The central bank is forecasting inflation will average 1.7% this year, before rising to 3.3% in 2026 and 3.4% in 2027.

The Philippine Stock Exchange Index (PSEI) fell by 3.28% month-on-month in September, breaching the 6,000 level to close at 5,953.46. The index was dragged by negative market sentiment brought about by escalating domestic political risks. Overseas, the US Federal Reserve reduced interest rates by 25 basis points as widely expected in their September 17 meeting. FTSE Rebalancing also transpired where the Philippines saw net inflow of around US\$60 million. Back to the local front, RCR had a secondary share placement last September 22 priced Php7.75 or 5% discount from previous close.

The PSEI saw its activity slowed for the month with Average Daily Turnover at Php5.71 billion or 20% month-on-month. Meanwhile, foreigners still remained as net sellers at US\$72 million. Foreign Participation was recorded at 50%.

On a per stock basis, the top three index gainers for the month include: PLUS (+9.78%), LTG (+8.70%) and SCC (+6.99%). Meanwhile, the bottom three performers were: GTCAP (-16.59%), ALI (-13.04%) and URC (-12.47%).
