BPI-Philam Active Allocation Fund Market Commentary

The BPI Government Bond Index returned 1.29% in December as the local yield curve bull flattened, dropping 18 basis points (bps) on average. Average daily trading volume for the month amounted to PHP15.48 billion significantly lower than November's PHP29.54 billion with trades mostly seen on the long end of the curve.

The Bureau of the Treasury (BTr) held only one FXTN auction in December. The 10-year FXTN 10-71, was fully awarded at an average yield of 6.224%. Meanwhile, the scheduled 15-year FXTN issuance was cancelled. Towards the end of the month, the BTr released the auction schedule for the first quarter of 2024, with weekly Treasury Bill auctions and monthly FXTN issuances (3-, 5-, 7- and 10-year tenors) and an additional 20-year issuance in February with an offer size of PHP30 billion each.

In the local space, November headline inflation fell sharply to 4.1% year-on-year from 4.9% last month. The slowdown in inflation was driven by all major subsectors with food inflation decelerating to 5.7% year-on-year from the previous 7% and transport cost contracting by 0.8% year-on-year due to lower global oil prices. The BSP retained its key policy rate at 6.5% during its last monetary board meeting for the year. Despite the inflation figure trending lower, BSP Governor Eli Remolona noted that risks to the inflation outlook remain tilted to the upside.

The Philippine Stock Exchange Index (PSEi) finished the last month of the year on a strong note. The PSEi rose along with the global markets' rally on optimism spurred by the US Federal Reserve's (The Fed) decision to hold rates. Furthermore, the Fed discussed cutting rates in 2024 bolstering the dovish signal. On the local economic front, November inflation print was recorded at 4.1%, or lower than the 4.4% estimate. The PSEi rose by 3.64% month-on-month to close at 6,450.04 in December.

Trading activity improved to end the year, with average daily turnover registering at US\$89 mil or +25.4% month-on-month. Meanwhile, foreign buying was sustained for another month at US\$18 million with participation level at 49% in December. Foreigners continued to switch from banks to properties given the expected interest-rate scenario.

In terms of stock performance, the top three gainers for the month include: AGI (+15.10%), ICT (+14.37%) and JFC (+10.94%). Meanwhile, the bottom three performers were: ACEN (-8.75%), SMC (-5.46%) and AEV (-4.70%).

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
