Highest and Lowest Unit Price Achieved

Initial (15 June 2017)	1.0000
Highest (30 January 2018)	1.0596
Lowest (24 March 2020)	0.8083
NAVPU – 29 February 2024	1.0154

Risk Classification

The Fund is suitable for investors with an aggressive profile or for those who take long-term views. As a marked-to-market UITF, the Fund's net asset value and total return may fall as well as rise as a result of stock prices and interest rates movements. On redemption of units, an investor may receive an amount less than the original amount of investment. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience.

BPI-Philam Active Allocation Fund Market Commentary

The BPI Government Bond Index returned -0.03% in February as the local yield curve rose 10 basis points (bps) on average. Average daily trading volume for the month amounted to Php16.78 billion, lower than January's Php20.98 billion with trades mostly seen on the short-end and belly of the curve.

The Bureau of the Treasury (BTr) originally announced four FXTN auctions in February. The first FXTN issuance, the 5-year FXTN 05-78, was rejected by the BTr. Had the paper been fully awarded, the average yield of the 5-year paper would have risen to 6.219%. The next two FXTN auctions were also cancelled to give way to the 5-year RTB issuance. The BTr set the 5-year RTB at 6.25% coupon and raised a record Php458 billion, exceeding the initial Php400 billion target. Following the jumbo RTB issuance, the government issued a new 20-year paper, the FXTN 20-26, and set the coupon at 6.25%. Towards the end of the month, the BTr revised the March schedule of Treasury Bonds offering to 7-, 10-, 20- and 6-year.

In the local space, January headline inflation fell further to 2.8% year-on-year from the previous month's 3.9%. Despite the slowing of inflation, rice prices rose further to 23% year-on-year as international rice price benchmarks rose amid supply risks due to El Niño. The Bangko Sentral ng Pilipinas (BSP) held its first monetary policy meeting of the year and kept its key rate unchanged at 6.50%. The policymakers deem it appropriate to keep the policy rate on hold amid the improvement in inflation condition, but they are ready to adjust the policy settings to maintain price stability.

The Philippine Stock Exchange Index (PSEI) sustained its strong performance for the year, rising for another month. The index surged by 4.49% in February to 6,944.71. Foreigners were net buyers through all trading days of the month. Investor optimism is still driven by positive macro-economic data – decline in global yields, lower inflation, and 4th Quarter GDP strength.

Trading activity slowed in February, with average daily turnover at US\$95.3 million or 8.2% lower month-on-month. Meanwhile, foreign buying registered at US\$128.7 million in the same period. A slew of index names saw 52-week highs driven by foreign buying which also propelled the market to the 6,900-level. Foreign participation in the market stood at 50%.

In terms of stock performance, the top three index gainers for the month included: ICT (+18.93%), MONDE (+13.51%) and BPI (+13.11%). Meanwhile, the bottom three performers were: AGI (-8.99%), SMPH (-7.74%) and NIKL (-6.20%).

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
