Highest and Lowest Unit Price Achieved

Initial (15 June 2017)	1.0000
Highest (30 January 2018)	1.0596
Lowest (24 March 2020)	0.8083
NAVPU – 31 January 2024	0.9959

Risk Classification

The Fund is suitable for investors with an aggressive profile or for those who take long-term views. As a marked-to-market UITF, the Fund's net asset value and total return may fall as well as rise as a result of stock prices and interest rates movements. On redemption of units, an investor may receive an amount less than the original amount of investment. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience.

BPI-Philam Active Allocation Fund Market Commentary

The BPI Government Bond Index returned -0.18% in January as the local yield curve bear steepened, rising 13 basis points (bps) on average. Average daily trading volume for the month amounted to PHP20.98 billion higher than December's PHP15.48 billion with trades mostly seen on the long end of the curve.

The Bureau of the Treasury (BTr) held four FXTN auctions in January, all of which are new issuances. The 3-year FXTN 03-30, 5-year FXTN 05-78, 7-year FXTN 07-71, and 10-year FXTN 10-72 were priced at coupon rates of 6.000%, 6.125%, 6.125%, and 6.250%, respectively. In addition, with the tender bids reaching more than PHP100 million, the BTr offered tap issuances for the 7-year and 10-year papers, awarding PHP5 billion each.

In the local space, December headline inflation fell sharply to 3.9% year-on-year from previous month's 4.1%. Despite the December figure being the slowest print since February 2022, average inflation for 2023 concluded at 6%, which is still above the BSP's target range of 2% to 4%. The slowdown was mainly driven by easing inflation from most commodity groups such as housing, water, electricity, gas, and other fuels. Although price pressures are starting to ease, the BSP noted the unlikelihood of cutting policy rates for the first half of the year due to risks of supply shocks, consistent with the tones of the FED and other central banks.

The Philippine Stock Exchange Index (PSEi) got off to a hot start in 2024. The early-year optimism, fuelled by the prospects of potential rate cuts, has propelled risk assets to gain traction. Further bolstering this is the encouraging local macroeconomic data, which has boosted investor sentiment. Notably, December inflation data came in lower at 3.9% from November's 4.1% and below consensus estimates of 4.0%. In addition to that, 4Q2023 Philippine GDP growth was recorded at 5.6%, exceeding market expectations of 5.2%.

Against this backdrop, the PSEi concluded January at 6,646.44, marking a 3.04% month-on-month return.

Trading activity surged, with the average daily turnover registering at US\$104 mil or 16.6% month-on-month. Foreign investors opened the year as net buyers at positive US\$80 million in January with observable preference for big cap liquid names primarily holding firms and banks.

In terms of stock performance, the top three gainers for the month include: BLOOM (+13.62%), GTCAP (+12.80%) and MBT (+11.31%). Meanwhile, the bottom three performers were: NIKL (-11.68%), MER (-9.27%) and URC (-5.67%).

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
