Highest (30 January 2018)	1.1521
Lowest (17 March 2020)	0.6127
NAVPU – 30 June 2025	0.8855

Risk Classification

The Fund is suitable for investors with an aggressive profile or for those who take long-term views. As a marked-to-market UITF, the Fund's net asset value and total return may fall as well as rise as a result of stock prices and interest rates movements. On redemption of units, an investor may receive an amount less than the original amount of investment. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience.

BPI-Philam Equity Index Fund 2 Market Commentary

The Philippine Stock Exchange index (PSEi) traded sideways most of the month as the market digested a mix bag of macro-economic developments. Investor optimism was evident on the release of May inflation print which turned out better than expected. This, in turn, fueled bets of another round of rate cuts by the Bangko Sentral ng Pilipinas (BSP). However, optimism soon turned into jitters on renewed geopolitical tensions in the Middle East leading to a spike in global oil prices and weakening of the Peso. Towards the latter part of the month, the market saw FTSE rebalancing where the country registered a down-weight en-route to a net foreign outflow. The PSEi rose modestly by 0.37% month-on-month to 6,364.94 in June.

In terms of trading activity, the PSEi recorded a healthy Average Daily Turnover of Php6.642 billion in June. Meanwhile, foreigners remained net sellers for the third straight month at US\$72 million, partly due to FTSE rebalancing.

On a per stock basis, the top three index gainers for the month include: BLOOM (+22.25%), ALI (+17.39%) and PGOLD (+16.13%). Meanwhile, the bottom three performers were: CBC (-10.12%), BPI (-6.54%) and BDO (-5.09%).

⑩ Jollibee Foods Corp.	2.93%

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
