Highest and Lowest Unit Price Achieved

Initial (13 February 2015)	1.0000
Highest (30 January 2018)	1.1521
Lowest (17 March 2020)	0.6127
NAVPU – 29 December 2022	0.8624

Risk Classification

The Fund is suitable for investors with an aggressive profile or for those who take long-term views. As a marked-to-market UITF, the Fund's net asset value and total return may fall as well as rise as a result of stock prices and interest rates movements. On redemption of units, an investor may receive an amount less than the original amount of investment. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience.

BPI-Philam Equity Index Fund 2 Market Commentary

The Philippine Stock Exchange Index (PSEi) declined at the end of the year as foreign selling resumed following consecutive months of foreign inflows. Renewed concerns on elevated global interest rates and inflation were triggered by US Federal Reserve (FED) Chair Jerome Powell's announcement during the conclusion of its FOMC meeting that more data is needed for the FED to change its view on US inflation. This means that the FED is expected to keep rates higher throughout 2023 with no possible reduction until year 2024. On the local front, the Bangko Sentral ng Pilipinas (BSP) increased overnight borrowing rate by 50 basis points (bps) to 5.5%, the highest since November 2008. The PSEi gave up 3.2% to close at 6,566.39 in December

Trading volume ramped up in December, with Average Daily Value Turnover at US\$222 million or 86.5% higher month-on-month. Meanwhile, in terms of foreign activity, the market saw Net Foreign Outflows at US\$109 million. PLDT was the top stock sold in December with US\$40 million worth of foreign outflow and accounted for 30% of the market's overall decline.

For the individual stock performances, the top index gainers for the month include: AGI (+21.80%), ACEN (+7.17%) and MER (+6.71%). Meanwhile, the bottom index performers are as follows: TEL (-24.83%), MONDE (-12.34%) and MEG (-10.71%).

⑨ JG Summit Holdings, Inc.	4.23%
⑩ Universal Robinas Corp.	3.64%

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
