BPI-Philam Equity Index Fund

Market Commentary

The local equities market recovered anew in November after a weak October showing where the index fell below the 6,000-mark. The rally emanated from growing expectations that interest rates may have already peaked following a seemingly improved economic environment. Reports on higher-than-expected 3rd quarter GDP at 5.9%, cooling inflation from both local and the US, Philippine peso strength and central banks' (US Fed and BSP) decision to hold key policy rates propelled sentiment. Moreover, investors digested reports on 3rd quarter earnings results from Philippine companies which showed positive results, albeit at a slower pace which reflects the impact of higher inflation. The Philippine Stock Exchange Index (PSEi) rose 4.18% to 6,223.73 in November.

Trading activity continued to be uninspiring with average daily turnover slowing down further by -12.3% to US\$71 million for the month. In terms of foreign flows, foreigners finally turned "net buyers", after consecutive months of selling, and were also 53% of active participants. Net foreign inflow was recorded at US\$18 million for November.

In terms of stock performance, the top three gainers for the month include: ALI (+12.03%), JFC (+10.54%) and AC (+9.66%). Meanwhile, the bottom three performers were: ACEN (-9.43%), AGI (-7.55%) and NIKL (-7.34%).

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
