NAVPU – 29 September 2023	1.5771

Risk Classification

The Fund is suitable for investors who take medium- to long-term views. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience. The Fund's net asset value, and total return may fluctuate as result of stock price movements. On redemption of shares, an investor may receive an amount less than the original amount of investment. Liquidity risk also needs to be taken into account.

BPI-Philam Equity Index Fund

Market Commentary

The local equities market rebounded by the end of September to close the month in positive territory. Early to middle of the month, weakness was experienced as the index dipped to an intraday low of 5,998 amid FTSE's rebalancing movements. Sentiment was further dampened as headline inflation accelerated to 5.3% in August 2023 (vs 4.7% in July). However, losses were fully recouped by the end of September as investors deployed proceeds from the tender offer of Metro Pacific, Inc. and bottom-fishing of bombed out names with deep value. Overall, the PSEi went up by 2.4% MoM closing at 6,321.24 in September.

Trading activity during the month further improved as changes in FTSE and PSEi constituents triggered portfolio rebalancing. Average Daily Turnover came in at Php6.58 billion from Php5.21 billion in August, albeit foreigners continued net sellers at US\$179 million.

For stock performances, the top three gainers for the month were as follows: MONDE (+25.42%), CNVRG (+23.55%) and SCC (+9.06%). Meanwhile, the bottom three index performers included: BLOOM (-8.68%), UBP (-6.52%) and JFC (-3.21%).

⑤ Int'l. Container Terminal Services, Inc.	6.08%

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
