### Market Commentary

The Philippine Stock Exchange Index (PSEi) went narrowly down for the month of June. Market sentiment was weak due to the depreciation of the Philippine Peso when it hovered near the Php59 level. In addition, the FTSE rebalancing related activity further pulled the local bourse to the year-low of 6,158.58. However, the market bounced towards the latter part of the month on bargain hunting as investors digested BSP Governor's dovish rhetoric and lower inflation outlook. The PSEi closed at 6,411.91 or 0.3% lower month-on-month in June.

Trading activity was subdued for the month. Average Daily Turnover only recorded at Php4.4 billion. Meanwhile, foreign activity continued to register net outflows at US\$104 million for June. Index proxies SM and AC both recorded the biggest outflow as market sentiment remained weak. Foreign participation improved from 46% to 48% for the month

On a per name basis, the top three index gainers for the month were: AEV(+10.70%), MBT (+8.86%) and ALI (+8.57%). Meanwhile, the bottom three performers include: MONDE (-16.07%), JGS (-15.97%) and CNPF (-14.27%).

**Risk Warning:** Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA\* internal data.
