BPI-Philam Global Equity Fund Market Commentary

Global equities market volatility persisted for the month of July, continuing the trend of regional divergence seen earlier in the year. The U.S. equities market rallied hitting two new all-time highs within the month as optimism over potential resolutions in Trump's trade tariffs drove stocks. Semiconductor and hardware companies led the charge, with eight of the top ten S&P500 performers coming from the technology sector.

European and Asian markets likewise outperformed, buoyed by monetary easing and sector-specific tailwinds. The Euro Stoxx50 returned 2.6% for the month, driven by increased defense spending and infrastructure investment. Meanwhile, Japan's Nikkei continued its uptrend, supported by a weaker yen and robust earnings in manufacturing and technology.

The June data released last month highlights a global rotation toward markets benefiting from monetary stimulus and sectoral momentum, particularly in defense, infrastructure, and technology. As inflation pressures ease in parts of Europe and Asia, investor appetite for non-U.S. equities continues to grow, highlighting the shifting macroeconomic landscape.

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
