BPI-Philam Growth Fund Market Commentary

The Philippine Stock Exchange Index (PSEi) rose for the third month in a row despite the early sell-off that transpired following the effectivity of US President Donald Trump's tariffs on April 2 and the succeeding announcement of reciprocal tariffs. Initially, the index sank to a 52-week low in the 5,800-level but managed to bounce back after the US President decided to take a "pause" on the tariffs, which lifted sentiment and supported a relief rally. Moreover, a slew of domestic macro-economic developments further propelled the recovery, these include March inflation coming out lower-than expected at 1.8%, a 25 basis-point rate cut by the Bangko Sentral ng Pilipinas (BSP), as well as the continued appreciation of the Philippine peso. Given those, the PSEi climbed 2.82% to 6,354.99 in April.

In terms of trading activity, the Average Daily Turnover grew by 3.5% to Php5.80billion in April. In terms of foreign activity, foreigners turned net sellers, registering US\$54 million amidst the tariffs pronouncements. Top foreign sold stocks were ICT (US\$50.1 million), SMPH (US\$16.2 million), and JFC (US\$11.80 million). Foreign participation remained at 55% in April.

On a per stock basis, the top three index gainers for the month include: URC (+18.21%), BLOOM (+16.78%) and PGOLD (+13.70%). Meanwhile, the bottom three performers were: GLO (-12.17%), ACEN (-12.17%) and DMC (-7.67%).

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA's internal data.
