Risk Classification

The Fund is suitable for investors who take medium- to long-term views. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience. As a marked-to-market Mutual Fund, the Fund's net asset value, and total return may fluctuate as a result of movements in stock prices and interest rates. On redemption of shares, an investor may receive an amount less than the original amount of investment. Liquidity risk also needs to be taken into account.

TOP HOLDINGS Asset Allocation

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data. BPI-Philam Growth Fund Market Commentary

The Philippine Stock Exchange (PSEi) ended the year on a positive note and managed to close above the psychological 6,000 level. Lower-than-expected domestic November inflation print and rate cuts from both the US Federal Reserve (The Fed) and the Bangko Sentral ng Pilipinas' provided the lift. Meanwhile, ongoing worries over the country's slowing economic growth, peso weakness and foreign selling capped the upside. The PSEi closed 2025 at 6,052.92 or +0.51% on a month-on-month basis.

Trading activity slowed in December, with Average Daily Turnover at Php5.73 billion or 7.7% lower than in prior month's Php6.22 billion. Foreigners were net sellers with a hefty US\$202 million and were more active at 54% participation.

On a per stock basis, the top three index gainers for the month include: AGI (+16.50%), ALI (+10.32%) and CBC (+9.83%). Meanwhile, the bottom three performers were: PLUS (-33.88%), PGOLD (-9.52%) and SM (-5.47%).
