Market Commentary

The Philippine Stock Exchange Index (PSEi) displayed a roller coaster performance for the month following a slew of market moving events globally. The PSEi initially rose to as much as 2.4% earlier in March before declining on news of Silicon Valley Bank (SVB) and Credit Suisse's collapse which sent shockwaves through the global financial system. The market also priced in the direction of the elevated interest rates and inflation.

Meanwhile, on the local economic front, the Bangko Sentral ng Pilipinas (BSP) raised policy rates by 25 basis points to 6.25% as Philippine Inflation remained high at 8.6%. In terms of inflation forecast, the BSP adjusted the 2023 and 2024 to 6.0% (from 6.1%) and 2.9% (from 3.1%), respectively.

The local bourse gave up 0.9% to close at 6,499.68 in March.

In terms of average daily turnover, the local bourse was less active for the month at US\$130.9 million or 10.6% lower compared to 146.4 million registered in February. Meanwhile, Foreigners remained net sellers with an outflow of US\$498 million, further stretching the Year-to-date figure to US\$518 million. Foreign participation clocked in at 47% (from 48%).

For the individual stock performances, the top three index gainers for the month are as follows: TEL (+10.51%), DMC (+8.90%) and SCC (+7.83%). Meanwhile, the bottom three index performers include: CNVRG (-21.28%), MONDE (-18.66%) and AEV (-10.37%).

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA's internal data.
