

FUND FACT SHEET

All data as of June 30, 2023 unless otherwise stated

Fund Objective and Strategy

The Fund, operating as a Feeder Fund, aims to achieve long-term capital appreciation by investing in a Target Fund with a diversified portfolio of attractively-priced stocks with high dividend yields in the Asia Pacific region. It aims to outperform its benchmark which is the MSCI AC Asia Pacific ex-Japan High Dividend Net Return USD Index.

Fund Details

Fund Manager	BPI WEALTH – A Trust Corporation
Inception Date	March 12, 2015
Fund Classification	Equity Fund
Fund Size	USD 4.77 Million
Fund Currency	United States Dollar
Target Fund	JP Morgan Asia Equity Dividend Fund
Fund Management Fee	1.10% per annum

Highest and Lowest Unit Price Achieved

Initial (12 March 2015)	1.0000
Highest (10 February 2022)	1.3167

NAVPU – 30 June 2023	1.1319

Risk Classification

The Fund is suitable for investors with an aggressive profile or for those who take long-term views. As a marked-to-market UITF, the Fund's net asset value and total return may fall as well as rise as a result of stock prices and interest rates movements. On redemption of units, an investor may receive an amount less than the original amount of investment. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience.

Brambles Ltd.	2.1%

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data. BPI-Philam Odyssey Asia Pacific High Dividend Equity Fund

Market Commentary

Asian equities ended the month up in June after a rocky May. A smoother than expected resolution to the US debt ceiling challenge, and continued momentum in the AI/Tech trade led equity markets higher. The MSCI Asia Pacific ex-Japan Net Index returned 3.1% for the month, with value outperforming growth. Australia, India and Greater China gained the most, while Thailand and Indonesia and Malaysia detracted.
