Fund Management Fee	1.50% per annum

Highest and Lowest Unit Price Achieved

Initial (11 September 2012)	1.0000
Highest (27 September 2024)	1.2912
Lowest (10 October 2012)	0.9829
NAVPU – 30 September 2024	1.2842

Risk Classification

The Fund is suitable for investors with an aggressive profile or for those who take medium- to long-term views. As a marked-to-market UITF, the Fund's net asset value and total return may fall as well as rise as a result of stock prices and interest rates movements. On redemption of units, an investor may receive an amount less than the original amount of investment. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience.

Asset Allocation

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data. BPI-Philam Odyssey Balanced Fund

Market Commentary

The BPI Government Bond Index rose month-on-month, gaining by a hefty 2.01% in September as Philippine government bond yields decreased by an average of 52 basis points (bps). Average daily trading volume for the month reached Php 50.2 billion, up from Php41.3 billion in August, with most trades concentrated in 5 and 10-year securities. The Bureau of the Treasury (BTr) held four FXTN auctions in September, fully awarding the 3-, 5-, 10-, and 20-year tenors. Auction highs were generally aligned with, or came in slightly below, secondary market bids at the time, with the BTr awarding at 6.050%, 6.075%, 5.974%, and 5.899%, respectively.

On the domestic front, we saw headline inflation return to its downward trend as it decelerated to 3.3% in August from 4.4% in July, exceeding economists' median estimate of 3.6%. The lower-than-expected inflation was driven mainly by decreases in food inflation after lower rice tariffs brought rice prices down to 14% from 21% a month earlier. Another driver for the decline in yields was the BSP's announcement to reduce the reserve requirement ratios (RRRs) by 250 basis points for universal banks down to 7%. Every 1% cut in RRR is estimated to release 130 to 150 billion pesos worth of liquidity into the system. This new RRR will take effect on October 25, 2024.

Internationally, US inflation decelerated from 2.9% in July to 2.5% in August, in line with median estimates. US Federal Reserve officials highlighted the ongoing moderation in inflation and slowing economic data, supporting the case for a possible rate cut in September.

The Philippine Stock Exchange Index (PSEi) surged in September driven by strong foreign flows. The rally emanated from the US Federal Reserve's (The Fed) decision to cut its key overnight borrowing rate by 50 basis points that spurred the appetite for riskier assets. On the local economic front, the Bangko Sentral ng Pilipinas' (BSP) surprise announcement of reducing the reserve requirement ratio (RRR) by 250 basis points to 7% further buoyed the local bourse. The index breached the 7,400 mark until profit-taking took place. By the end of the month, the PSEi settled at 7,272.65 or 5.4% higher month-on-month.

The market turnover rose by 16% to Php6.57 billion in September from Php5.63 in the prior month. This was supported by net foreign inflow at US\$346 million. This is the biggest monthly inflow for year and has pushed the year-to-date net foreign flow to the positive territory. Top foreign bought stocks were SM (+US\$47.2 million), AC (US\$36.2 million) and ALI (US\$35.3 million).

On a per stock basis, the top three index gainers for the month include: JGS (+18.30%), GTCAP (+16.99%) and URC (+13.96%). Meanwhile, the bottom three performers were: SMC (-9.09%), SCC (-4.13%) and WLCON (-2.66%).
