Highest and Lowest Unit Price Achieved

Initial (11 September 2012)	1.0000
Highest (08 October 2024)	1.2965
Lowest (10 October 2012)	0.9829
NAVPU – 31 January 2025	1.2091

Risk Classification

The Fund is suitable for investors with an aggressive profile or for those who take medium- to long-term views. As a marked-to-market UITF, the Fund's net asset value and total return may fall as well as rise as a result of stock prices and interest rates movements. On redemption of units, an investor may receive an amount less than the original amount of investment. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience.

TOP HOLDINGS Asset Allocation

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data. BPI-Philam Odyssey Balanced Fund Market Commentary

The Philippine Stock Exchange Index (PSEi) took a dive to start a year amidst a lackluster month. Investors erred on the side of caution on persisting concerns over the Trump 2.0 presidency and less favorable domestic economic data. Trading activity accelerated in the latter part of the month following the PSE semi-annual index review or PSE rebalancing where China Banking Corp (CBC) and AREIT Inc (AREIT) got included in the 30 names basket, replacing Wilcon Depot Inc (WILCON) and Nickel Asia Corp (NIKL). The PSEi began 2025 by falling 10.20% month-on-month to 5,862.59.

Trading activity, as measured by the Average Daily Turnover, improved by 1.11% to Php4.88 billion in January. This was mainly lifted by the PSE rebalancing in the last trading day of the month. Prior to the day, the Average Daily Turnover only recorded at Php4.10 billion. In terms of foreign activity, foreigners were net sellers with US\$113 million outflow. Top foreign sold stocks were ALJ (-US\$21.2 million), MBT (-US\$20.6 million), and BDO (-US\$19.5 million). Foreign participation in January was at 49%.

On a per stock basis, the top three index gainers for the month include: CBC (+46.46%), AREIT (+10.67%) and TEL (+3.47%). Meanwhile, the bottom three performers include: WILCON (-41.26%), NIKL (-37.82%) and AGI (-33.33%).

Domestic fixed income investments performed well in January 2025, with the BPI GS Overall Index up 0.57%. This was due to steady income from bonds and falling yields, as people expect the Bangko Sentral ng Pilipinas (BSP) to cut rates in February after the Philippine economy grew slower than expected in the last quarter of 2024. The economy grew by 5.2%, which was below expectations, partly due to multiple typhoons. Inflation rose to 2.9% in December, driven by higher vegetable prices, utility costs, and transport expenses. The BSP is expected to cut the policy rates by a total of 0.5% (50 basis points) in 2025.
