BPI-Philam Odyssey High Conviction Equity Fund Market Commentary

The Philippine Stock Exchange index (PSEi) traded sideways most of the month as the market digested a mix bag of macro-economic developments. Investor optimism was evident on the release of May inflation print which turned out better than expected. This, in turn, fueled bets of another round of rate cuts by the Bangko Sentral ng Pilipinas (BSP). However, optimism soon turned into jitters on renewed geopolitical tensions in the Middle East leading to a spike in global oil prices and weakening of the Peso. Towards the latter part of the month, the market saw FTSE rebalancing where the country registered a down-weight enroute to a net foreign outflow. The PSEi rose modestly by 0.37% month-on-month to 6,364.94 in June.

In terms of trading activity, the PSEi's Average Daily Turnover was healthy at Php6.64 billion in June. Meanwhile, foreigners remained net sellers for the third straight month at US\$72 million, partly due to FTSE rebalancing.

On a per stock basis, the top three index gainers for the month include: BLOOM (+22.25%), ALI (+17.39%) and PGOLD (+16.13%). Meanwhile, the bottom three performers were: CBC (-10.12%), BPI (-6.54%) and BDO (-5.09%).

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA's internal data.
