Risk Classification

The Fund is suitable for investors with an aggressive profile or for those who take long-term views. As a marked-to-market UITF, the Fund's net asset value and total return may fall as well as rise as a result of stock prices and interest rates movements. On redemption of units, an investor may receive an amount less than the original amount of investment. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience.

BPI-Philam Odyssey High Conviction Equity Fund

Market Commentary

The Philippine Stock Exchange Index (PSEi) finished the last month of the year on a strong note. The PSEi rose along with the global markets' rally on optimism spurred by the US Federal Reserve's (The Fed) decision to hold rates. Furthermore, the Fed discussed cutting rates in 2024 bolstering the dovish signal. On the local economic front, November inflation print was recorded at 4.1%, or lower than the 4.4% estimate. The PSEi rose by 3.64% month-on-month to close at 6,450.04 in December.

Trading activity improved to end the year, with average daily turnover registering at US\$89 mil or +25.4% month-on-month. Meanwhile, foreign buying was sustained for another month at US\$18 million with participation level at 49% in December. Foreigners continued to switch from banks to properties given the expected interest-rate scenario.

In terms of stock performance, the top three gainers for the month include: AGI (+15.10%), ICT (+14.37%) and JFC (+10.94%). Meanwhile, the bottom three performers were: ACEN (-8.75%), SMC (-5.46%) and AEV (-4.70%).

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
