

FUND FACT SHEET

All data as of April 30, 2025 unless otherwise stated

Fund Objective and Strategy

The Fund aims to achieve a steady stream of income by investing in a diversified portfolio of Philippine Peso denominated high-grade fixed income instruments, such as, but not limited to, government securities, corporate notes and bonds, and fixed income funds. The Fund aims to outperform its composite benchmark, 75% of the 91-day Philippine Treasury Bill– net of tax and 25% of the BPI 1-5 Year Index.

Highest and Lowest Unit Price Achieved

Initial (25 October 2011)	1.0000
Highest (30 April 2025)	1.4861
Lowest (25 October 2011)	1.0000
NAVPU – 30 April 2025	1.4861

Risk Classification

The Fund is suitable for investors who take medium- to long-term views. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience. The Fund's yield, net asset value, and total return may fluctuate as a result of interest rate movements and the changes in credit quality of the investments. On redemption of shares, an investor may receive an amount less than the original amount of the investment. Liquidity risk also needs to be taken into account.

TOP HOLDINGS Asset Allocation

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data. BPI-Philam Peso Bond Fund Market Commentary

April 2025 was a stable month for the Philippine local fixed income market, characterized by mixed movements in yields and strong investor demand for government securities. The market navigated through global economic uncertainties and local fiscal policies effectively. The BPI Philippine Government Bond Index returned 0.30% for the month as rates crept higher by 3 bps on average, mostly on the long end of the curve. Both domestic and international factors, including central bank policies, inflation trends, and geopolitical developments affected yield movements for the period.

The Bureau of Treasury (BTr) initially announced 4 FXTN auctions for the month. The first two were re-issuances of 5-year FXTN 7-70 and 7-year FXTN20-17, both fully awarded at average rates of 5.908% and 5.986%, respectively. The 15-year auction scheduled in the last week of April was cancelled to accommodate for the jumbo 10-year FXTN issuance. The government raised a total of PHP 300 billion of FXTN 10-73 with the coupon rate set at 6.375%.

Demand for government securities remained strong, particularly for medium-term bonds. On the other hand, short-term rates saw an increase due to position trimming to fund the settlement of new 10-year paper. Local inflation slowed further to 1.8% in March 2025, down from 2.1% in February. This easing inflation supported stable bond prices. The Bangko Sentral ng Pilipinas (BSP) eased its policy rate by 25 basis points bringing the benchmark rate to 5.50%. Moreover, the BSP reduced its risk adjusted inflation forecast to 2.3% (from 3.5%) for 2025 and 3.3% for 2026.
