

FUND FACT SHEET

All data as of October 31, 2023 unless otherwise stated

Fund Objective and Strategy

The Fund intends to achieve for its participants total return through a combination of current income and long-term capital appreciation by investing in listed companies that have high dividend yields or have established a history of dividend payouts. The Fund aims to provide returns in excess of the return of the Philippine Stock Exchange index (PSEi).

Fund Details

Highest and Lowest Unit Price Achieved

Initial (12 March 2015)	1.0000
Highest (30 January 2018)	1.1268
Lowest (17 March 2020)	0.6719
NAVPU – 31 October 2023	0.8559

Risk Classification

The Fund is suitable for investors with an aggressive profile or for those who take long-term views. As a marked-to-market UITF, the Fund's net asset value and total return may fall as well as rise as a result of stock prices and interest rates movements. On redemption of units, an investor may receive an amount less than the original amount of investment. Prior to investment in the Fund, the investor shall undergo a client suitability assessment procedure to determine whether the Fund is appropriate for him considering his investment objective, risk tolerance, preferences and experience.

BPI-Philam Philippine High Dividend Equity Fund Market Commentary

The Philippine Stock Exchange Index (PSEi) sank below the 6,000 mark as a slew of unfavourable macroeconomic developments kept investors on the edge. On the global front, weakness in US indices and global equities was evident as an effect of rising yields where 10-year US Treasury yields climbed over 5% for the first time since 2007. Moreover, the US Federal Reserve (Fed) maintained their hawkish stance as they opted to keep interest rates elevated to fight sticky inflation. The on-going geopolitical tensions between Israel and Hamas added to concerns with its potential escalation to other nations in the Middle East. This pose further risk to global oil prices. On the local economic front, the Bangko Sentral ng Pilipinas (BSP) decided to hike its policy rate by 25 basis points to 6.5% in an off-cycle meeting to counter supply-side pressures in CPI inflation. The PSEi dipped 5.5% month-on-month in October to close at 5,973.78.

Trading activity in October subsided after strong activity seen in index-rebalancing events in September. Average daily turnover registered at US\$81 million or 37.8% lower month-on-month. Meanwhile, foreigners continued to be net sellers with US\$171 million worth of outflows.

In terms of stock performance, the top three gainers for the month included: ACEN (+7.94%), TEL (+2.89%) and EMI (+0.24%). Meanwhile, the bottom three performers were: SCC (-16.91%), AGI (-13.96%) and CNVRG (-12.81%).

⑩ Ayala Corporation	5.05%

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
