

FUND FACT SHEET

All data as of June 30, 2023 unless otherwise stated

Fund Objective and Strategy

The Fund aims to achieve a balance of income and capital growth through a diversified portfolio of US dollar-denominated fixed-income instruments.

Fund Details

Fund Manager	BPI WEALTH – A Trust Corporation
Inception Date	April 18, 2016
Fund Classification	Bond Fund
Fund Size	USD 57.97 Million
Fund Currency	US Dollars
No. of Holdings	41
Fund Management Fee	1.25 % per annum

Highest and Lowest Unit Price Achieved

Initial (18 April 2016)	1.0000
Highest (6 September 2021)	1.1084
Lowest (16 December 2016)	0.9680
NAVPU – 30 June 2023	1.0478

Risk Classification

The Fund is suitable for investors who take medium- to long-term views. The Fund's yield, net asset value and total return may fluctuate as a result of interest rate and currency movements and the changes in the credit quality of the investments. On redemption of shares, an investor may receive an amount less than the original amount of the investment. Liquidity risk also needs to be taken into account.

BPI – Philam US Dollar Bond Fund 2 Market Commentary

The JP Morgan Asia Credit Index (JACI) Philippines rose by 0.74% in June as Philippine dollar-denominated bonds outperformed US Treasuries.

Global bonds had a volatile month as investors continued to witness persistent inflationary pressures across the world. US core CPE was at 4.7% year-on-year in April, while US core CPI was at 5.3% year-on-year in May. Both remained well above the Fed's target of 2%. Meanwhile, the Bank of England announced a hawkish 50-bps hike following the release of elevated UK CPI at 8.7% year-on-year.

During its Federal Open Market Committee meeting held mid-month, the Fed held policy rates steady but noted that it could potentially raise rates twice more before the end of the year. The Fed's updated economic forecasts showed inflation to still be above target, which could justify further hawkish actions moving forward. For the month, the 10-year US Treasury yield rose by 20 basis points lower to close the month at 3.84%.

In the local economic space, inflation for the month of May settled at 6.1% year-on-year from the 6.6% print in April. The figure was once again lower than market expectations, and was brought about by receding supply-side pressures. Consequently, the BSP kept rates steady during its Monetary Board meeting mid-month, citing the improvement in local prices. Nevertheless, policy officials reiterated that they remained prepared to adjust policy settings as needed, and added that easing inflation would give them more flexibility moving forward. The newly-appointed BSP Governor, Eli Remolona, will officially begin his term on July 3.

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
