Highest (04 January 2022)	1.4907
Lowest (23 March 2020)	0.7383
NAVPU – 29 September 2023	1.3450

Risk Classification

The Fund may be suitable for investors looking for exposure in the large and mid-capitalization stocks across developed countries and have an investment horizon of medium to long term. The **underlying fund** uses optimizing techniques to achieve a similar return to its benchmark index. These techniques may include the strategic selection of certain securities that make up the benchmark index or other securities which provide similar performance to certain constituent securities. Benchmark is MSCI World Index

BPI-Philam World Equity Fund

Market Commentary

Global equity markets declined in September. The Federal Reserve kept rates steady but remained hawkish in tone, keeping the possibility of another rate hike before yearend. The FOMC (Federal Open Market Committee) members also projected that rate cuts will be pushed back, with median end-2024 and end-2025 target rate projections being forecasted 50 bps higher compared to June projections. Sentiment weakened and risk assets sold off as interest rates rose and rate cut expectations have been pushed back, reinforcing the higher for longer narrative. In terms of business activity, the US economy barely remained in the expansionary territory, with its composite PMI barely unchanged from 50.2 to 50.1 month-on-month, driven by further contraction in the manufacturing sector. The MSCI All Country World Index returned -4.10% for the month, with developed markets, underperforming its emerging counterparts. Across other regional markets, Chinese and Hong Kong equities sold-off amid the region's challenged real estate sector and weaker than expected economic data.

Cumulative Performance (%)

GEOGRAPHIC BREAKDOWN (%)

Geographic exposure relates principally to the domicile of the issuers of the securities held in the product, added together and then expressed as a percentage of the product's total holdings. However, in some instances it can reflect the location where the issuer of the securities carries out much of their business.

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially. In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved. **Disclaimer:** Unless otherwise noted, all information contained herein is sourced from BPI AIA* internal data.
